- Plate 1. Aerial view of Wallingford and the part-flooded Thames (north to the right). The earthworks of both *burh*/town defences (top centre) and castle (bottom right) stand out clearly. Photo courtesy of the Environment Agency. [Christie, p. 36]
- Plate 2. View looking west across the Thames: the spire of St Michael's church is to the left and Wallingford bridge to the right. Only part of the bridge stands in the river itself; the stonework reveals multiple phases of building and repair. [Christie, p. 43]

- Plate 5. Part of the southern façade of the pumping station at Lake Street waterworks, showing the typical high, round-headed windows. The original engine house, on the right, was built in 1856; the Butterly rotative engine house, on the left, was added in 1862. Photograph by author. [Woolley, p. 77]

Drinkwater (OxS, CEDBP 25 (NS) 03–04–1901), reproduced by permission of Oxford City Council. Lower right: letter from the manager, asking for quick approval of the plan (OxS, CEDBP plan 25 (NS) 03–04–1901), reproduced by permission of Oxford City Council. [Woolley, p. 79]

[Woolley, p. 91]
- Plate 11. An etched glass window and a tiled entranceway embellish the offices at Archer, Cowley & Co.'s furniture packing and storage warehouse, Park End Street (H.J. Tollit, 1901). Photographs by author. [Woolley, p. 91]
